LinkedIn — Portfolio — GitHub — Codolio

Summary

Computer Science undergraduate with 2+ years of experience in Android and AI-powered application development. Built 5+ full-stack projects, solved 400+ DSA problems, and finalist at a national-level hackathon. Experienced in delivering production-ready applications with high ML accuracy, scalable Firebase integrations, and reliable automation workflows.

Education

KIET Group of Institutions, Ghaziabad

B.Tech in Computer Science and Engineering

Relevant Coursework: Data Structures, Algorithms, Operating Systems, OOP

2023 – 2027 (Pursuing)

CGPA: 7.45

St. Mary's Christian School (CBSE)

Class X

2019 – 2020

85%

Experience

Hackathons & Open Source

2023 – Present

- Finalist at GIH Hackathon 2025 (Galgotias College), selected from 120+ teams.
- Built Android and AI-based solutions across 7+ national and collegiate hackathons.
- Contributor at GirlScript Summer of Code (GSSoC), collaborating on open-source projects.
- Selected for OSCI 2025; maintained Android and web-based open-source projects.

Coding Samurai — Android Developer Intern

Oct 2025 – Nov 2025

- Completed a 4-week internship focused on production-ready Android applications.
- Developed applications using Kotlin, Jetpack Compose, and Firebase.
- Implemented authentication, real-time databases, and responsive UI components.
- Followed Git-based workflows, debugging practices, and agile development methods.

Deloitte Australia — Cybersecurity Virtual Internship

2025

- Conducted simulated risk assessments and vulnerability analysis.
- Performed threat modeling using industry-standard cybersecurity frameworks.
- Delivered structured reports on incident response and mitigation strategies.

Projects

Patient Data Secure System using Blockchain (MEDILEDGER)

Node.js, Blockchain, IPFS, React

<https://github.com/rookiecoder910/MEDILEDGER>

- Designed a decentralized medical data management system ensuring data integrity and privacy.

- Implemented blockchain-based access control for tamper-proof medical records.
- Integrated IPFS for secure off-chain storage with on-chain hash verification.
- Developed RESTful APIs for patient, doctor, and medical record management.

Crop Disease Detection System

FastAPI, TensorFlow/Keras, Streamlit

<https://github.com/rookiecoder910/crop-disease-detector-backend>

- Trained CNN models to classify 38+ crop diseases with over 95% accuracy.
- Built a full-stack ML system with FastAPI backend and Streamlit frontend.
- Optimized inference pipeline to achieve sub-second prediction latency.
- Designed scalable APIs and tested concurrent request handling.

Skills

Languages: Kotlin, Java, Python, C++, JavaScript

Mobile: Android Studio, Jetpack Compose, Firebase, Retrofit, Hilt

Backend: Node.js, FastAPI, Spring Boot (Basic)

AI/ML: TensorFlow, Keras, CNNs, NLP, Model Deployment

Databases: MySQL, MongoDB, SQLite, Room DB

Automation: n8n, Make, Workflow Orchestration

Tools: Git, GitHub, Docker, Postman, VS Code, Figma

Competitive Programming: LeetCode (1560+), Codeforces (1100), Codolio

Certifications

- Palo Alto Networks Cybersecurity Training (99% score)
- Data Structures & Algorithms Track — 400+ problems solved (LeetCode, Codeforces, HackerRank)
- UiPath Automation Foundation Course
- Certificate Portfolio: Google Drive
